Dear MERGE hiring team,

I am applying for the VP, Account Management - Pharma / Life Science role at MERGE. I spent eight years managing pharmaceutical agency accounts, with responsibility for client relationships, large consumer businesses, multichannel campaigns, regulated review, strategic recommendations, and team delivery. Since then, I have led enterprise UX teams, advised executives, and built workflow tools for pharmaceutical agencies. That combination gives me a broader operating view than I had earlier in my account career.

At FCB Health, I was one of two consumer account leads on the agency's largest pharmaceutical business and managed the \$20M Namenda XR direct-to-consumer launch. I led the broadcast workstream for three national commercials in one year, from market research and med-legal review through FDA preclearance, production, and network clearance. The spots drove a 45% increase in new-to-brand consumers within seven weeks. Earlier, on the \$10M NUVIGIL consumer business, I owned weekly client status and financial reporting, OPDP submissions, multichannel delivery, and annual strategic recommendations. I also worked alongside the HCP team on the NUVIGIL site and sales aid.

CNS work has been a consistent part of my pharmaceutical background. It includes Namenda XR in Alzheimer's disease, XYREM in narcolepsy, NUVIGIL in sleep and wakefulness, and Zoloft in psychiatry. At Scout Marketing, I was promoted to Account Supervisor / Digital Strategist and led XYREM consumer work across digital, print, social, and in-office channels. The work included Jazz's first unbranded social campaign and a digital program that doubled qualified traffic to the brand site.

The work that followed added the leadership range I would bring back to account management. At Heartbeat Ideas, I turned research into patient, HCP, and brand-team experiences. At Kinesso, I grew a distributed design team from 2 to 30, led analytics work used by more than 7,000 people across 22 brands, and partnered with C-suite stakeholders on monetization and go-to-market planning. Today, I build pharmaceutical agency tools for claim review, brief intake, scoping, review routing, and MLR preparation.

My record is strongest in DTC account leadership, large-budget stewardship, and cross-functional delivery. Setting commercial forecasts and carrying measured expansion targets would be a step up in scope, not something I would claim from my earlier roles. I am interested in MERGE because the role connects that responsibility with the pharmaceutical, CNS, team-leadership, and technology experience I already bring. I would welcome the chance to discuss the fit.

Sincerely,

Wally Mostafa
