Dear 21GRAMS hiring team,

I am applying for the Senior Account Executive role at 21GRAMS. I spent eight years in healthcare and pharmaceutical agency account management, including Senior Account Executive roles at FCB Health, Barker DZP, and Cline Davis & Mann before my promotion to Account Supervisor at Scout Marketing. My work covered primary client contact, brand budgets up to \$20M, financial reporting, integrated campaigns, and FDA and MLR review.

At FCB Health, I was one of two consumer account leads on the agency's largest pharmaceutical business and managed the \$20M Namenda XR direct-to-consumer launch. I led the broadcast workstream for three national commercials in one year, coordinating market research, med-legal review, FDA preclearance, production, talent, locations, directors, and network clearances. The spots drove a 45% increase in new-to-brand consumers within seven weeks. Earlier, on the \$10M NUVIGIL consumer business, I owned weekly client status and financial reporting, OPDP submissions, multichannel delivery, and annual strategic recommendations.

I began as the primary client contact across brand teams, affiliates, and vendors on Pfizer's Prevenar 13 adult pre-launch work. At Scout Marketing, I led Jazz Pharmaceuticals' XYREM consumer account, including its first unbranded social campaign and a digital program that doubled qualified traffic to the brand site. Since account management, I have led UX and analytics teams and built pharma agency tools for claims review, scoping, review routing, and FDA signal monitoring. That work has made me better at using data, seeing operational risk early, and keeping connected workstreams clear.

The role's focus on client needs, strategy, budgets, financial updates, and delivery risk matches work I have done directly. I would welcome the chance to discuss how that account background and the operating experience I built afterward could support the 21GRAMS team.

Sincerely,

Wally Mostafa
