SUMMARY

Founding product designer and AI product strategist with 15 years across pharma, healthcare UX, enterprise SaaS, design systems, user research, and client-facing AI POCs. I turn ambiguous workflows into usable AI products by staying close to users, framing the problem before the build, and designing the control surfaces where people inspect, correct, and trust model outputs. Strong fit for TuneLab's need to translate differentiated AI/ML capability into partner-facing biotech workflows.

CAPABILITIES

Discovery & Problem Framing — User interviews, workflow mapping, prototype validation, research synthesis, prioritization, and clear product direction before engineering commits

AI Product Workflow Design — LLM/VLM workflows, RAG/knowledge bases, model behavior, evidence surfaces, human review, error states, and trust-building interaction patterns

Design Systems & SaaS Craft — Enterprise UX, information architecture, data visualization, component systems, Figma documentation, accessibility, and lightweight system governance

Life Sciences & Enterprise Delivery — 11 years across pharma/healthcare communications, FDA/HIPAA/MLR workflows, HCP/patient UX, client workshops, and stakeholder adoption
