SUMMARY

AI systems and product architecture lead with 15 years across enterprise UX, regulated AI workflows, customer-facing solution design, and build-ready POCs. I translate ambiguous business problems into architectures spanning workflow, data, model behavior, cloud/app layers, governance, security controls, and human review. Strongest fit: AI model lifecycle design, secure enterprise delivery, implementation guidance, and technical storytelling across product, engineering, sales, and client teams.

CAPABILITIES

System-Level AI Architecture — Customer requirements, workflow decomposition, data assumptions, model behavior, RAG/knowledge bases, orchestration patterns, review surfaces, and solution blueprints

Model Lifecycle & Deployment Planning — Model-output review, prompt/context criteria, source grounding, evaluation loops, failure states, monitoring needs, update paths, and production handoff

Secure Enterprise & Regulated Delivery — HIPAA/FDA/MLR constraints, privacy, access control, data protection, auditability, documentation, governance, and stakeholder adoption in high-trust environments

Customer-Facing Solution Design — Discovery workshops, architecture narratives, tradeoff framing, prototype validation, implementation guidance, enterprise analytics, and cross-functional communication
