## SUMMARY

---

AI product and implementation leader with 15 years across AI POC delivery, enterprise UX systems, regulated pharma workflows, client strategy, and distributed team leadership. I lead ambiguous AI opportunities from roadmap framing through working prototypes, stakeholder demos, governance constraints, and product/engineering handoff. My strongest fit for Director of AI Development is setting AI product direction, translating model behavior into usable systems, mentoring cross-functional teams, and building responsible AI workflows for client and internal platforms.
