SUMMARY

Product marketing and AI implementation leader with 15 years across B2B technology services, enterprise UX, pharma/healthcare, client strategy, and AI POC development. I turn complex AI workflows into positioning, value props, launch narratives, demos, enablement, and stakeholder-ready content. For Lenovo Hybrid AI Advantage with NVIDIA, my strongest fit is translating agentic, physical, and edge AI concepts into customer demand stories for manufacturing, robotics, and retail without losing governance, ROI, or buyer relevance.

CAPABILITIES

Hybrid AI & NVIDIA Partner Messaging — Solution positioning, value propositions, message houses, demo storylines, and Omniverse/Metropolis-style use-case narratives for manufacturing, robotics, and retail buyers

Product Marketing & Launch Enablement — Customer presentations, web/event content, FAQs, brochures, video-script inputs, sales narratives, launch planning, marketing governance, KPI framing, and ROI reporting

Agentic, Physical & Edge AI Storytelling — LLM/VLM workflows, AI product behavior, automation logic, evidence-backed demos, trusted-AI framing, and translation of technical systems into market-facing value

Enterprise Customer & Market Insight — Customer requirements, buying behavior, competitive audits, stakeholder interviews, regulated workflows, executive storytelling, and practical token-economics framing

Partner & Matrix Delivery — Product, sales, marketing, creative, account, engineering, executive, and partner collaboration across launches, client workshops, enablement, and ongoing amplification
