SUMMARY

AI implementation and product systems lead with 15 years across LLM/VLM workflow design, regulated AI delivery, enterprise UX systems, and client-facing POC development. I translate complex model behavior, source data, human review, and product requirements into build-ready AI systems that teams can evaluate, trust, and operate. For Yotta Labs, the strongest fit is LLM workflow architecture, model-output review loops, AI infrastructure translation, evaluation-minded delivery, and collaboration with technical teams building production AI platforms.

CAPABILITIES
