SUMMARY

AI implementation and product strategy lead with 15 years across regulated healthcare, enterprise UX, client strategy, and hands-on AI workflow delivery. I turn ambiguous operational problems into governed AI tools, agent-assisted build loops, documentation systems, and reviewable product surfaces. My strongest Mi-Case fit is helping teams make AI agents safe, useful, and repeatable across real delivery workflows with clear review gates and grounded implementation scope.

CAPABILITIES

AI Agent Workflow Enablement — Claude/Codex/Gemini-assisted build loops, structured context, repo guidance, prompt-defined criteria, review surfaces, and reusable workflow patterns

Regulated AI Implementation — LLM/VLM workflows, RAG/knowledge bases, MLR review logic, FDA/HIPAA context, evidence gaps, audit-ready annotations, and human oversight

Product Tooling & Delivery Systems — Discovery, requirements, prototype validation, front-end build, backend logic, API integrations, production handoff, and stakeholder iteration

Documentation, Adoption & Governance — Technical writing, research ops, Figma documentation, roadshows, training surfaces, accessibility (WCAG), metrics, and cross-functional enablement
