SUMMARY

AI work design and product strategy lead with 15 years across human-centered AI adoption, enterprise UX, regulated healthcare workflows, client strategy, and team leadership. I help teams define where humans, machines, data, and governance should sit in the work - then turn that strategy into usable workflows, adoption narratives, analytics surfaces, and measurable execution. My strongest fit for Deloitte Human Capital is translating AI-era change into operating models people can understand, trust, and use.

Analytics, Scenario Logic & Value Realization - Dashboard workflows, scoring models, scenario inputs, evidence trails, benchmark logic, data visualization, and measurable cycle-time reduction

Executive Communication & Cross-Functional Alignment - Client presentations, stakeholder working sessions, workshop outputs, leadership-ready narratives, and Business/Product/Data/IT/engineering collaboration

Regulated Enterprise Change Delivery - 11 years across pharma/healthcare, MLR review, FDA/HIPAA workflows, HCP/patient UX, client workshops, and deadline-driven delivery
