Dear MERGE hiring team,

I am applying for the Account Director - Pharma / Life Science role at MERGE. I spent eight years managing pharmaceutical agency accounts, with day-to-day responsibility for client relationships, DTC and multichannel work, budgets, scopes, strategic recommendations, and regulated review. Since then, I have led UX teams and built workflow tools for pharmaceutical agencies. I know the account work firsthand, and the years that followed gave me a stronger view of how strategy, analytics, technology, and delivery fit together.

FCB Health was the center of my agency career. I was one of two consumer account leads on the agency's largest pharmaceutical business and managed the \$20M Namenda XR direct-to-consumer launch. I led the broadcast workstream for three national commercials in one year, from market research and med-legal review through FDA preclearance, production, and network clearance. The spots drove a 45% increase in new-to-brand consumers within seven weeks. Earlier, on the \$10M NUVIGIL consumer business, I owned weekly client status and financial reporting, OPDP submissions, multichannel delivery, and annual strategic recommendations.

At Scout Marketing, I was promoted to Account Supervisor / Digital Strategist and led Jazz Pharmaceuticals' XYREM consumer work across digital, print, social, and in-office channels. The work included Jazz's first unbranded social campaign and a digital program that doubled qualified traffic to the brand site. My account career began at RosettaWishbone, where I served as the primary contact across Pfizer brand teams, national affiliates, and vendors while owning briefs, scopes of work, key opinion leader communication, client status, and financial reports.

After account management, I moved into pharmaceutical UX and enterprise design leadership. At Heartbeat Ideas, I turned stakeholder research into patient, HCP, and brand-team experiences. At Kinesso, I grew a distributed design team from 2 to 30 and led analytics work used by more than 7,000 people across 22 brands. Today, I build tools for pharmaceutical agencies that support claim review, brief intake, scoping, review routing, and MLR preparation. This work has made me better at spotting operational friction, framing opportunities, and helping teams make clear decisions.

I am ready to bring that broader perspective back to healthcare account leadership. MERGE's mix of life sciences, media, analytics, technology, and creative work is a close match for both my agency foundation and the work I have done since. I would welcome the chance to discuss the role.

Sincerely,

Wally Mostafa
