SUMMARY

AI enablement and workflow implementation lead with 15 years across enterprise UX, client strategy, pharma operations, and practical AI tooling. I help non-technical teams identify high-value use cases, translate AI capability into usable workflows, and move from training and lightweight business cases into working prompts, automations, internal tools, and adoption loops. My strength is bridging business operations, stakeholder education, responsible-use judgment, and hands-on AI delivery.

CAPABILITIES

AI Adoption & Literacy — Department-specific training, plain-language AI translation, workshops, templates, prompt practices, quick wins, and non-technical enablement

Use-Case Discovery & Prioritization — Workflow assessment, opportunity backlog shaping, lightweight business cases, effort/outcome framing, and executive-ready recommendations

Workflow Automation & Internal Tools — LLM/VLM workflows, bots, prompt systems, knowledge workflows, AI-assisted development, API-connected prototypes, and production handoff

Governance, Privacy & Responsible Use — Human review surfaces, data-handling judgment, regulated healthcare context, FDA/HIPAA/MLR workflows, and policy-aligned adoption practices

Cross-Functional Change Leadership — Stakeholder influence without direct authority, research roadshows, documentation, design systems, client workshops, and enterprise team scaling
