SUMMARY

AI implementation and product strategy lead with 15 years across marketing intelligence, healthcare/pharma communications, enterprise UX, client strategy, and AI workflow delivery. I turn ambiguous team requests into prioritized AI initiatives, working prototypes, measurable workflows, and adoption-ready product systems. My strength is bridging marketing operations, stakeholder translation, model behavior, UX, and change management so AI tools become useful after the demo.

Change Management & Enablement — Roadshows, research operations, communities of practice, team training surfaces, executive communication, documentation, and cross-functional adoption
